Amadeo Ramirez

College Station, Texas | aramirez6880@tamu.edu

Education

Texas A&M University College Station, Texas

M.S. in Economics Expected May 2027

Graduate GPA: 3.571. Graduate econometrics and statistics: Economic Analytics (A), Regression Analysis (A).

B.S. in Agricultural Economics, Cum Laude December 2025

Undergraduate GPA: 3.621. Minor: Economics; concentration: Policy and Economic Analysis.

Selected completed coursework: Foundations of Microeconomic Theory, Foundations of Macroeconomic Theory, Regression Analysis, Economic Analytics, Linear Algebra, Experimental Economics.

Fall 2026 (in progress): Mathematical Economics, Engineering Mathematics III (multivariable calculus), Foundations of Mathematics, Economics Capstone.

Planned Spring 2027: Analysis on the Real Line, Distribution Theory, Economic Forecasting.

Research interests: Behavioral and experimental economics, industrial organization, market design.

Independent Research

Does the Crowd Add to the Forecast? 2026–Present

Probability Forecasts in Kalshi Weather Markets – M.S. capstone and writing sample

- Designed the research questions, forecast comparisons, test specifications, and scoring rules for a study of Kalshi daily-high-temperature contracts versus NOAA's National Blend of Models.
- Constructed a matched dataset of market quotes, public forecast vintages, and settlement outcomes for 1,435 event-days across four cities using AI-assisted scripts; personally checked samples of each dataset.
- Evaluated 139 chronologically held-out New York event-days using multicategory Brier scores, a time-block bootstrap, and HAC inference; Kalshi's mean loss was 14.5% below NBM's.
- Distinguished held-out evidence from exploratory cross-city, forecast-revision, and station-bias analyses; separated forecast accuracy from claims about information sources or economic mechanisms.

Luco and Marshall (2020) Replication 2026–Present

The Competitive Impact of Vertical Integration by Multiproduct Firms

- Reproduced selected reduced-form specifications in R using `fixest`, including Tables 4A, 4B, and 6, with product-store, product-week, and store-week fixed effects and county-clustered inference.
- Examined treatment definitions, comparison-group restrictions, pretrend diagnostics, and indirect treatment through rival-price responses; maintained a published-versus-reproduced comparison record.

Professional Experience

Quality Fasteners – Sales Representative and Analyst May 2023–May 2026

- Served construction and agriculture supply accounts, from individual mechanics to lead purchasers.
- Checked sales and product records in Python, built Excel and Power BI reports, and communicated pricing and product recommendations to management and customers.

NWF Strategies – Political Consulting Intern July 2024–January 2025

- Supported political campaign outreach through robocalling.

Technical Skills and Languages

Programming: R (`fixest`, `ggplot2`), Python (`pandas`, `statsmodels`), SAS (coursework), Stata (reading).

Tools: Excel, Power BI, LaTeX.

Certifications: FINRA Securities Industry Essentials (SIE).

Methods: Panel data, fixed effects, difference-in-differences, probabilistic forecast evaluation, block bootstrap, HAC inference, data validation.

Languages: English (native), Spanish (intermediate).
